

## ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

MEMORANDUM

DATE: February 8, 1982

TO: Charles R. Bell, Jr., Manager, FOS, DPWS

FROM: Cecil Van Etten, DPWS, Region VI, Champaign *CV 2/8/82*

SUBJECT: Clinton - Meeting of 1/28/82

RECEIVED

FEB 16 1982

U.S. ENVIRONMENTAL PROTECTION AGENCY  
REGIONAL OFFICE  
CHICAGO, ILLINOIS

Per a request from Bob O'Neill, water commissioner for Clinton, the writer attended a meeting at City Hall on the afternoon of the above date to discuss the present problems associated with the water system. Present representing the City were Bob O'Neill; Mayor Stites; Vic Dickinson, City Manager; and Dale Weikle, Plant Operator. Larry Hensly and a second representative of Randolph and Associates Inc, engineers for the City; Tony *Taubert* representing Reever Copper and Brass; and three reporters representing local newspapers were also present.

Areas discussed included: present water quality problems, in particular, removal of iron; the events surrounding the December, 1981 boil order, recommended by the Agency; and the current chlorine residuals and related problems in the distribution system. The contents of the 1/27/82 evaluation letter were not discussed as it had been received by the City just prior to the meeting.

The writer believes the meeting in general went well. Randolph and Associates were asked to proceed regarding examination of the aeration unit, filters, and related equipment for possible renovation and/or replacement.
